Prologue

Everyone has that one dream. That one mindset and goal. For some people they're goal is to become famous. For some people their goal is to become even The President of the United States of America! But for you and me, our main dream is to someday become rich. And I am constantly at work improving my skills and using a method that I am going to show you, that will help you start earning money in no time.

Hello There Reader! I would like to inform you that you are Just a couple of steps away from becoming one of the most Successful internet money Makers and Social Engineer in the world. With this guide you will learn my main method of rigging in the dough as well as every tactic and trick I have used to become wealthy online. My main method is used in a social engineering way if you will, so before you jump right Is.

In computer security, social engineering is a term that Describes a non-technical kind of intrusion that relies heavily on human interaction and often involves tricking other people to break normal security procedures. A social Engineer runs what used to be called a "con game".

As you can see, using this method we will be tricking Someone into giving you cash. This method is a more modified and working version of E-Whoring. And it is perfectly legal!

What You Need

- A Hotmail Account.
- Microsoft Messenger.
- My Space Account.
- An E-Whore Package.
- MySpace Tag Me Application.
- Hotspot Shield (Or a Proxy of your choice).
 - PayPal or Alertpay.
- The Guts to use Human Manipulation
Known Facts about how girls act and what
they like.

This Part of the E-Book is self-explanatory and is pretty easy to follow. Basically, you will be registering pretending to be a girl. Remember, you **MUST** use fake information. And you may now be thinking. “Whoa, wait, I thought he said this was legal?” Correct you are, BUT, if the person you are manipulating were to find out you were not a girl it could possibly put you in danger. And people can of course look you up on the internet, which honestly, is not that hard. Below is an example of how the registering on Hotmail should look like.

✔ angelplusyou@hotmail.com is available.

Hotmail address: @

Create a password:
6-character minimum; case sensitive

Retype password:

✘ Please enter your email address in the format someone@example.com.

Alternate email address:

[Or choose a security question for password reset](#)

First name:

Last name:

Country/region:

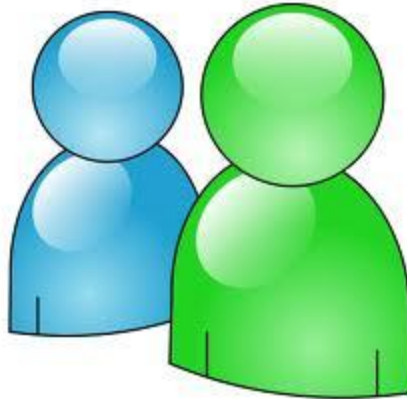

✘ Required information is missing.

State:

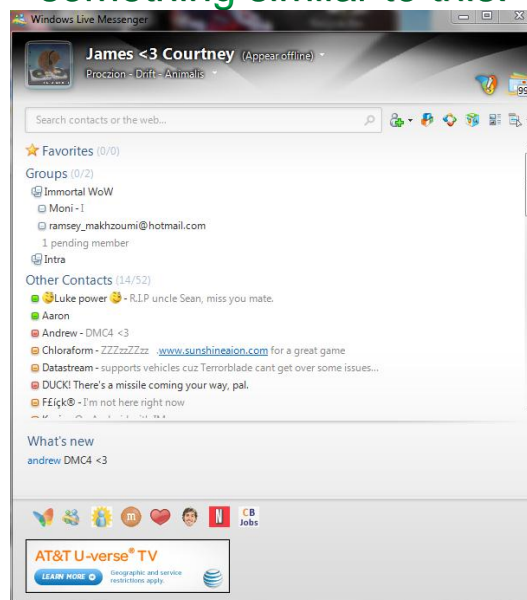

✘ Verify that you've entered the correct information.

ZIP code:

Gender: Male Female

So now let's move on to Microsoft Messenger. You will be downloading Microsoft Messenger from the link provided in the list of needed items. Download Microsoft Messenger, Run the installation, and then import the information from your newly created Hotmail account into the username and password box. Once this has been accomplished you may now login. Inside you will find a list of all your added contacts, your status, MSN news, and other cool features. Change your avatar to a flower or something girly and change the display name as well. Make it sound sexual as this will create more a distinct interest in the male buying this girl's photos. Once everything is all setup you may proceed to the next step. When you login you should see something similar to this:

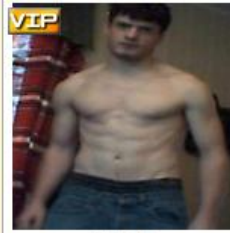

setting up myspace

This part of the method is very lengthy and can take a very long time. If you do not have the time to spare at the moment I recommend doing it another time.

First, direct your URL to MySpace and register your “fake” account which the victims will be viewing and looking at. Upload pictures of the girl from the E-Whore Package (Make sure the uploads have actual clothes on). If you are having trouble and/or do not know how to do this, here is a tutorial on how to upload a photo on MySpace. Once that is done you can browse Google for some themes to upload onto your Profile that is feminist like. If you do not know how to import a theme on MySpace please visit here. Now, post some updates and etc. saying you are coming over from Facebook and you are new to MySpace and things like that. Make it look as realistic as possible. Once this task is set, you will need to get the application for MySpace called Tag Me. All you have to do is search it in the application section and it will pop right up. If it doesn't I have provided a link to it anyway. Download it, and you should see something like this. (Refer to Page below)

If you see this, great! You have successfully completed the installation of Tag Me and your MySpace profile. Now we are going to move on to one of the fastest, yet hardest, and most anticipated act. **(Scroll down to get started).**

safety first!

Before we get started, we are going to have to setup a VPN called Hotspot Shield. Basically, this is going to mask our IP Address so unwanted people can't trace us and view our information. This also falls into the fake information category. So, visit the [website for Hotspot](#) and then download it. Run all the setup components and start it up. It should direct you to something like this upon running it:

[Details](#)

Eventually, it will say connected, it takes about 3-10 seconds.

going for the kill

Load Your AK-47 into the car, it's time to go out to the deal. Before you begin, make sure your proxy is running, you have made no mistakes in your information, you haven't skipped any steps, etc. As this can greatly affect how well you do when the deal goes down.

The first thing we are going to do is click on the shout out button located on the Tag Me Application, you will see a box like this, input something similar to what I have stored in the box. (It does not have to be same exact thing).

Hey boys... i am feelingggg reallyyyy horny atm maybe i will exchange tags for nudes? maybe even my number ;)

Post Comment (150 chars) Post for pets

You can also try the adult section which usually works, just leave the tag part out. And what is real good about this application is: It is not moderated by MySpace at all. Saying things like this is perfectly fine which makes this a perfect E-Whoring place. Once you hit that post comment button,

BOOM! You will be getting messaging and tags going all over the place. In you're about me, include the fake MSN you created and include if you wanted nudes, message me here, or something along those lines. Or you can include it in your comment. But within moments you will be getting spammed by suckers that would like to buy your photos. If they refuse to pay for them, **move on there are TONS of more people that will say yes. But there is an 8/10 chance they are going to buy your photo's. And Congratulations by the way!**

tips and info

Please take the time to read this. Information in here is critical and will help you so much when you are doing this. One thing I have noticed on this application is, there is different type of people, and you have the real girls that spend all their money and are a MySpace narcissist that do not have a life outside of appearing appealing to others. And you have the other girls, who try to get people to tag them for other tags because they may not be as pretty as the other girl. I recommend you aim towards the other side of this, as more guys will notice you.

But, you may be thinking: "I don't have money to spend on points and all this other stuff I need" (You will figure out was points are when you get more involved in this method). Well, 2 payments should be pretty good enough to get yourself featured on the front page. So, you can buy a few gold and keep posting, and hope someone buy's you to get yourself noticed, which is a lot easier than just blowing away \$40 every day.

I also recommend you use a better VPN/Proxy than Hotspot. Paid is recommended. I have heard stories where people have not had their ups with it. I personally find it fine, but I rarely use it.

And one of the most important tips of all: **delete your contact after they have bought from you. I cannot stress this enough.** The reason you want to do this is to prevent tracking of yourself, as people can perform a DOX attack upon you and find your address, and then it is all over for you.

what to expect

You better prepare yourself for the ride of your life. Making money is not easy and it will NOT happen overnight. You will make roughly about \$100-200 a day if you are very good at what you do and are an experienced social engineer. To do this method, it doesn't require much talent or experience as well, which makes it good. You will sometimes experience very nasty people, that will call you names, try not to get mad at them, it pisses me off too (I hate perverts

as much as you do. Trust me. Sometimes they may perform a chargeback. If this happens contact the guy and ask nicely why he charged back, politely ask for your pictures back, if he does not listen and is very defiant **leave. You do not want to attract attention to yourself.**
